Kizuri

Harvest date

# KIZURI

## At a glance...

> Firmness: 8.8 kg, Brix: 13.4 %, Acidity: 5.8 g/l, starch: 6.6

---

> Flowering time 1-2 days before Golden (S2-S24).

Pollinators: Pinova, Idared, Golden Gem, Golden Hornet, (Granny, Golden, Braeburn).

---

> Calcium spraying to avoid bitterpit and lenticelbreakdown is recommended.

---

> Low chilling requirement, between Zonga (low) and Nicoter (medium)

---

> Commercial license: worldwide, ABCz Group ([www.abcz-group.com](http://www.abcz-group.com))

---

Kizuri stands out because of its sweet and aromatic taste. This taste is complemented by a very firm texture. It can be no surprise that Kizuri scores very well in consumer trials.

This variety not only has a taste that appeals to consumers, but also has the looks. The nearly full blush in a vibrant red is a real eye catcher.

The storage capacity of Kizuri is equal to that of Braeburn and it even exceeds Braeburn in terms of shelf life.

Better3fruit is convinced that this variety can compete with the best late season varieties.
